2017-2018

PROGRAM CODE: AAS.ACH.LAND-DSGN (*Fast Track Option – See Note Below*)

FACULTY CONTACT: Michael Ryan

PROGRAM NAME: Architecture and Interior Design- Landscape Design

PROGRAM SCHOOL: Science & Tech

AACC faculty developed the following charts to encourage greater success in your program of study. Why take classes in this order? The courses in the first column are designed to prepare you for courses in the second column and so on. Students with no developmental requirements in English or reading may register for a total of 18 credits per term. If you are a part-time student, you may take fewer credits by dividing the recommended courses across multiple terms to accommodate your schedule.

Note: This program has been identified as a **Fast Track Option**. The general education, computing and information technology competency and diversity requirements are considered satisfied for those students who hold an associate, baccalaureate or master's degree from a U.S. regionally accredited college or university and whose program of study includes at least 20 hours of general education courses (excluding physical activities courses). A minimum of 30 credits must be earned at this college; see Graduation Requirements in the current catalog for more information. Students must meet all course prerequisites. Official transcripts from all previous institutions attended must be submitted to the Office of Records and Registration. Students planning to transfer using an articulation agreement should check specific course requirements at www.aacc.edu/transfer.

This is a recommended sequence of courses. Please refer to current college catalog for specific graduation requirements. Certain courses may only be offered in the day or evening and some may only be offered in the fall or spring semesters. So it is strongly recommended that students take those courses when offered in order to stay on track for their degree or certificate. Consult with ACH Department Chair for program advising questions and recommendations. Students are encouraged to contact the other departments for non-ACH course offerings listed.

P This course has a credit course prerequisite. Specific course prerequisite information can be obtained by looking at the Course Descriptions section of the College Catalog or in the Schedule of Classes.
